

GERARD CUBAKA BISIMWA

Geologist (BAC+5/Exploration and Mining Geology)

PRESENTATION

I graduated in exploration and mining geology.

Having discovered geology in high school, while the geography teacher was giving a lesson on volcanoes and magmas, I quickly understood that this job particularly interested me.

My passion for geology was born at university during an academic internship on a land in Katana, at a hydrothermal spring.

Today, what I like most about this job is the digital simulation of geological processes.

FORMATION

UOB-BEPM

BUKAVU
May 2019

3D Digital Modeling Training

During this training, I learned to estimate the potential of a deposit and model it in 3D.

UOB

BUKAVU
2018 - 2019

Master in Exploration and Mining Geology

Formation which gave me a solid training on almost all the basic concepts of geology.

MAPATANO

BUKAVU
2009 - 2014

Bachelor of General Pedagogy

It was during this school course where I had my first encounter with geosciences, my great passion.

EXPERIENCES

LAVAFRI

BUKAVU
2020 - Now

Manufacture of ready-to-wear clothes

Management and technical direction, production control, design, sales and digital marketing.

UOB

BUKAVU
2018 - 2019

Landslide Research Project

Assessment of the distribution of landslides in the Katana-Birava sector..

DIVIMINE-SK

BUKAVU
Dec 2019

Professional Internship (iTSCi System)

Operation of the mining sector with the mining code and different traceability systems. The journey of the minerals, from the digger to the buyer.

OVG

GOMA
May 2018

Academic internship

From data acquisition to volcanological processing for the monitoring of volcanoes in the VIRUNGA chain in North Kivu.

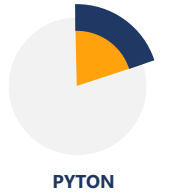

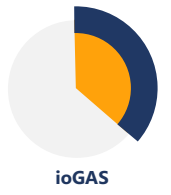

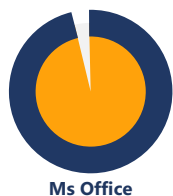

BANRO

TWANGIZA
April 2017

Professional Internship

Exploration campaigns, core preparation, database management, estimation, modeling and production optimization.

SKILLS

HOBBIES

Documentary films, soft music and
Cartoons

Drawing and Graphics

Photography

Ecommerce

Sewing

Reading

Kitchen

Piano

Music theory

Tourism

Basketball

AVAILABILITY

I am immediately available for an interview.

If my profile interested you on one point or another, do not hesitate to contact me to tell you a little more. Really, it will be a GREAT pleasure for me to meet you...

MOTIVATION

I have been working as a manager for 2 years ago in a clothing manufacturing start-up company that I created with my relatives during the Covid 19 confinement in May 2020.

What I particularly appreciated in this entrepreneurial adventure was the discovery of my team spirit, my professional rigor, my determination to achieve my goals, my sense of leadership and work organization. I like to put the needs of customer first. Honestly, my greatest satisfaction is when I see the smile of a satisfied customer. It's fun.

I like to bring meaning into the actions of my employees through my optimism and my joy everyday, in order to see them evolve and progress. I don't like to see an unproductive and unmotivated teammate. I even managed to set up a training and support framework to make my teammates completely independent. This has helped my service to increase its productivity by 30%.

Today what matters most to me is to direct my career towards other horizons. Especially those who have a link with my field of study, geosciences, to continue to learn and acquire new experiences alongside new people, in new teams, while integrating my dynamism and my skills, making them more productive and more impactful. That is why I want to work with you.

Finally, I would say that almost all my collaborators would testify that I have a constant thirst to learn and progress. My dream is to one day run a large company. To get there, I have to learn a lot. I admit that I see in your establishment a real opportunity in this. Really, I would even work FOR FREE as long as your job allows me to learn and grow exponentially.
